

Terms of Warranty

Industrial X-Ray Equipment

Unless otherwise specified, all new GE Sensing & Inspection Technologies equipment, with the exception of evacuated devices, glassware and electronic items listed below, is guaranteed for twelve months from the date of the delivery note to be free of defects in workmanship and materials. Any part so failing will be repaired or replaced free of charge. The end-user shall bear the risk of loss and the expense of transportation for equipment shipped to and from GE Sensing & Inspection Technologies,

i.e. the warranty provision covers delivery ex factory uninsured and presupposes freight free, risk-insured shipment of the merchandise to GE Sensing & Inspection Technologies. This guarantee, however, does not cover damage resulting from an improper operation in violation of the instructions given in the operating manual, in particular damage resulting from neglected or irregular checkups and maintenance of the cooling system or the high voltage plug connections as well as of other system

components that have to be checked regularly. This warranty covers one-shift operation. In case of several shifts, the warranty period is reduced accordingly.

Certain parts that are identified as wear-and-tear parts are excluded from this warranty.

Special restrictions apply to the following components:

Metal-Ceramic X-Ray Tube

The warranty period covers eighteen months, each month consists of thirty days. Alternatively it covers 2000 operating hours, whichever applies first. Warranty begins on the date of the delivery note. GE Sensing & Inspection Technologies grants full replacement

within the first ninety days of the warranty. Starting with day ninety-one the customer is charged proportionately on a pro rata usage basis against the purchase of a replacement X-ray tube. In such a case operating hours accumulated to date of failure of the tube will not

be taken into consideration. X-ray tubes that have not been operated in accordance with the prescribed warm-up instructions of the operating manual are excluded from warranty, irrespective of the date they were first put into operation.

Glass Industrial X-Ray Tubes

600 operating hours pro rata within twelve months, i.e. the customer is charged pro rata on the operating hours run, for replacement under warranty terms.

naire supplied with the X-ray tube be returned to our company, containing all details pertaining to the X-ray tube. No warranty is extended to X-ray tubes or high voltage cables which are operated on power supplies not approved by GE Sensing & Inspection Technologies.

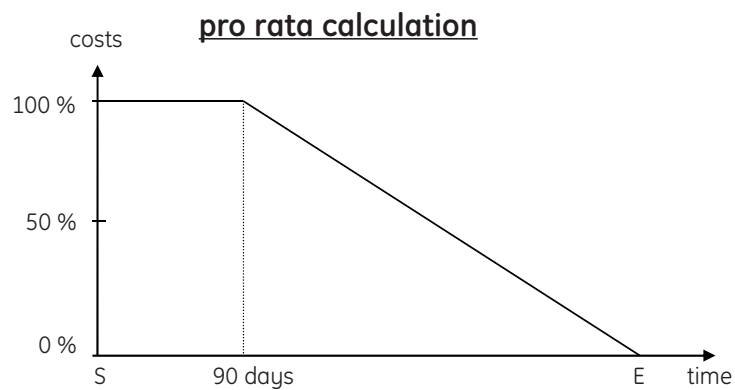

X-ray tubes are only warranted if their installation in X-ray tube housings has been carried out by personnel that is authorized by GE Sensing & Inspection Technologies.

Note: For the processing of warranty claims we request that the question-
